Proposal Panel 1 : 2601631

[Back to Proposal](#)

Agency Name:

National Science Foundation

Agency Tracking Number:

2601631

Panel Summary

The panel found the intellectual merit of the proposal to be very good, but not as strong as several other proposals evaluated. The panel noted favorably that some of the proposed problems were quite ambitious. However, it was not clear to the panel which problems are motivating problems and which ones are concrete and tractable. Some of the problems, such as regularity rings of toric varieties, would have been more convincing if they had more detailed explanations for their strategy.

The panel found the broader impacts of the proposal to be excellent with unique activities. The committee work at national level is particularly impressive.

After a thorough discussion, the panel placed this proposal in the Low Priority category based on its evaluation of the intellectual merit and broader impacts.

The summary was read by/to the panel and the panel concurred that the summary accurately reflects the panel discussion.

PANEL RECOMMENDATION: Low Priority
